CAREER OBJECTIVE

AI & Data Science Engineering student with strong foundations in Python, C/C++, SQL, Machine Learning, Generative AI, and application development. Experienced in building RAG-based AI systems and full-stack applications using FastAPI, Flask, React, and ChromaDB, with demonstrated leadership and problem-solving skills.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

Coimbatore Institute of Technology

CGPA : 8.69

08/2024 – Present

Coimbatore,TN,India

HSC – Rayar Kalvi Nilayam | 91.67%

2023 – 2024

EXPERIENCE

Life Advisor – HDFC Life Insurance Company Limited

- Appointed as a Life Advisor with HDFC Life after qualifying the IC38 Life Insurance Agent Certification Examination.
- Gained exposure to life insurance, customer needs, and client communication.

07/2026 – Present

Tiruppur,TN,India

GridMind – Intelligent SCADA & EMS Platform

SCADA & Energy Management System (EMS) for Microgrids

- Researched SCADA, EMS, and BESS while analyzing renewable energy datasets.
- Developed AI-powered applications using Python, FastAPI, React, and Machine Learning.

05/2026 – 06/2026

Coimbatore,TN,India

C/C++ Programming Intern – SaiKet Systems

Software Development & Problem-Solving in C/C++

Completed programming tasks using C/C++, strengthening debugging, problem-solving, and coding practices.

PROJECTS

CreatorMind AI – AI-Powered Creator Knowledge & Content Platform

IBM SkillsBuild AI Builders Challenge | July 2026

- Built an AI-powered creator platform using RAG, FastAPI, React, ChromaDB, Supabase, and an IBM Granite-compatible architecture to preserve and scale a creator's writing style.
- Developed a knowledge-processing pipeline for searchable creator content and integrated AI Workspace, Writing Studio, Content Library, Analytics, and Calendar workflows with a mock AI provider.
- Repository:** github.com/gowthamvanjimuthu-cyber/CreatorMind-AI

07/2026

Enterprise Knowledge Assistant using RAG (Flask-based AI System)

- Developed a Flask-based Retrieval-Augmented Generation (RAG) application using TF-IDF and ChromaDB for document-grounded, context-aware querying.
- Built and deployed an interactive Flask MVP for real-time search, improving response grounding and reducing hallucinations.
- Repository:** <https://github.com/gowthamvanjimuthu-cyber/RAG-SYSTEMS>

02/2026 – 03/2026

IoT Accident Alert System | Academic Project - perpetual Fest 2025

- Built a crash-detection IoT system using impact sensors, GPS, and GSM for emergency response.
- Implemented real-time location alerts to hospitals, police, and family members, focusing on healthcare-oriented emergency applications.

02/2025 – 05/2025

GameHub – React-Based Interactive Gaming Platform

11/2024 – 12/2024

- Developed a React.js multi-game web application featuring 5 interactive mini-games using component-based architecture and React Hooks.
- Implemented React Router and a responsive UI using JavaScript ES6 concepts.

SKILLS

Programming: Python, C/C++, Java, SQL	AI & Data Science: Machine Learning, Generative AI, Retrieval-Augmented Generation (RAG)
Web Development: HTML, CSS, React.js	Core: Data Structures & Algorithms, REST APIs, Problem Solving
Frameworks & Libraries: Flask, FastAPI, ChromaDB	
Databases & Tools: SQLite, Git, GitHub, Supabase
